

ARV SOLUTIONS :: LATEST CANDIDATE AVAILABILITY

We started putting together our candidate profiles, and our list kept getting longer. It also kept changing as candidates get placed. So here is a different layout which we hope gives a useful summary of what people we have available currently.

DESIGN

DESIGNER | DESIGN ENGINEER | TEAM LEADER | TECHNICAL MANAGER | DESIGN MANAGER
Timber Frame | Roof Truss | I-Beams/Joists | SIPS | Light Steel Frame | Modular M&E | Modular

We're registering many more **Designers** for increasing vacancies. Some strong candidates are returning to the sector, and others who have been held back are now seeking career moves.

From junior to senior level plus skills in **estimating, coordination** and **project management**. We predict a severe shortages of these candidates within six months!

Timber Frame Structural Engineers have always been rare though we have a selection from a couple of years experience through to the most senior **Design Engineers** with strong TRADA links.

SITE

SITE MANAGER | PROJECT MANAGER | CONTRACTS MANAGER | QUANTITY SURVEYOR
Timber Frame | Modular | Pods | Housing | Commercial | Cladding & Curtain Walling | Precast

After advertising and filling key site roles recently, we have an extensive live database of further candidates with excellent offsite related **construction management** experience **UK wide**. Because we specialise in offsite we understand the need to appreciate manufacturing, as well as having construction skills, whether it be erecting timber frames or supervising modular building installations; and negotiate with main contractors and clients. We have people experienced in working to fast track time tables and solving **transport** and **logistics** issues. Many candidates have **Appointed Person** qualifications for supervising **crane lifts**, as well as **CSCS** and **SMSTS** Certificates.

MANAGEMENT and EXECUTIVE

OPERATIONS | GENERAL | CONSTRUCTION | COMMERCIAL | TECHNICAL | REGIONAL

As we come out of recession and think about strategies for the future, strategic management skills are in increasing demand. Fortunately we get frequent approaches from highly skilled senior candidates seeking opportunities. Additionally our targeted advertising campaigns are drawing out more passive senior candidates. Add this to our traditional networking skills and we are confident of offering an impressive short list for any senior Manager or Director level role – at our standard 15% fee levels.

Looking to regionalise or centralise? New products and services? New sectors? We have candidates with the skills to accelerate your plans that could add real value to your business.

PRODUCTION/MANUFACTURING

MANUFACTURING MANAGER | FACTORY MANAGER | PRODUCTION MANAGER | PLANNER | LOGISTICS | QUALITY ASSURANCE | SUPERVISOR | DEPOT MANAGER

This is one of our strongest skill areas. Our extensive candidate database includes skills in every aspect of offsite related manufacturing; with many also bringing further experiences from sectors such as automotive to bring new skills to your business. Skills include **lean manufacturing, 5S, continuous improvement** and **quality assurance** as well as working with fast track and often changing workflows involved with manufacturing for construction.

SALES

SPECIFIERS | ARCHITECTS | MERCHANTS | DEVELOPERS | HOUSING ASSOCIATIONS
CLIENTS | PUBLIC SECTOR | CONTRACTORS

Strong sales skills have been in demand throughout the last two years and in 2010 even more so. Candidate availability is dropping rapidly as the best candidates in this market are pro-active and getting snapped up in new roles fast. We now advertise and network quickly and extensively for new sales vacancies and urge clients to be ready to interview at short notice thus ensuring you beat your competitors to the best available sales people.
